12. FAQ

1. What is a research peptide?

Research peptides are compounds intended for laboratory and scientific research. They are supplied with supporting documentation to help researchers evaluate product identity and quality.

---

2. What does "Research Grade" mean?

Research Grade indicates that the product is manufactured and handled according to defined quality standards and is intended for research use. Specific standards may vary by manufacturer, so always review the available documentation.

---

3. Does every product include a Certificate of Analysis (COA)?

Yes. A Certificate of Analysis is available for each batch, providing information such as batch identification and testing results. You can access the corresponding COA from the product page or the COA Library.

---

4. How can I verify a batch?

Each product includes a batch number. Enter the batch number in the COA Library or Batch Lookup page to access the corresponding Certificate of Analysis.
